PROFESSIONAL SUMMARY

Early-career Quality Assurance (QA) and Software Testing professional with hands-on technical validation experience across mission-critical transit software and smart infrastructure systems. Proven competency in executing **Factory Acceptance Testing (FAT)**, **Site Acceptance Testing (SAT)**, and **regression cycles** against rigorous client specifications and Outstanding Issues Lists (OIL). **While an emerging entrant to the commercial software industry, brings a fast-learning aptitude, high technical agility, and an uncompromising commitment to quality.** Adept at structured defect logging, root-cause isolation with video/screenshot evidence, and cross-functional developer collaboration. Eager to rapidly master organization-specific QA methodologies, test automation frameworks, and quality standards to deliver immediate value.

CORE TESTING COMPETENCIES

- | | | |
|------------------------------------|---|--|
| ▪ Manual & Functional Testing | ▪ Test Case Design & Execution | ▪ Defect Lifecycle & Triage |
| ▪ Regression & Smoke Testing | ▪ Acceptance Testing (FAT / SAT / UAT) | ▪ OIL (Outstanding Issues List) Triage |
| ▪ Test Evidence & Audit Trail Prep | ▪ Issue Tracking (Redmine / PCS Vision) | ▪ SDLC, STLC & Agile Methodologies |
| ▪ REST API Testing Concepts | ▪ High-Availability Failover Testing | ▪ Hardware-in-the-Loop (HIL) Testing |
| ▪ Root Cause Analysis & Isolation | ▪ Rapid Learning & Framework Adaptability | ▪ Cross-Functional Communication |

PROFESSIONAL EXPERIENCE

Project Engineer Intern (QA & System Integration) Jan 2026 – Jul 2026
[Guildford Integrated Systems Sdn. Bhd.](#) Subang Jaya, Selangor, Malaysia

- Key Projects:** *RTS Link (Johor Bahru–Singapore Rapid Transit System) • LRT3 (Shah Alam Line) • Car Park Management Systems (CPMS)*
- Executed **Factory Acceptance Testing (FAT)** and **Site Acceptance Testing (SAT)** for Passenger Information Display Systems (PIDS) and Public Address (PA) software, systematically validating features against client-specified **Outstanding Issues Lists (OILs)**.
 - Managed end-to-end **defect lifecycle**: identified functional anomalies, authored detailed bug tickets in PCS Vision (Redmine) with comprehensive video/screenshot reproduction evidence, collaborated with software developers on remediation, and performed **regression testing** prior to client sign-off.
 - Conducted **High-Availability (HA) failover and redundancy validation** on ASL Vipedia broadcast server racks, simulating primary network link disconnections to verify automated active-standby switchover, alarm dispatching, and continuous service resilience.
 - Assembled, configured, and maintained a **Hardware-in-the-Loop (HIL) test bench** for CPMS smart parking systems, integrating microcontrollers (Raspberry Pi), relay modules, RFID/payment readers, and managed PoE switches for **4+ months of continuous stability and transaction testing**.
 - Performed **system administration and user provisioning**, setting up Role-Based Access Control (RBAC), Windows workstation profiles, and NTP server synchronization across distributed railway station endpoints.
 - Conducted **on-site field hardware commissioning** at operational LRT3 stations under strict EHS/PPE compliance, troubleshooting display enclosures, cabling, and auto-recovery boot sequences.

Web Developer Intern Sep 2022 – Dec 2022
[Xgen Groups \(Pvt\) Ltd.](#) Colombo, Sri Lanka

- Developed and validated web application features and RESTful API endpoints using **PHP (Laravel)** and **MySQL**, verifying request/response payload integrity and business logic compliance.
- Standardized API schemas for front-end and back-end integration, actively assisting in early-stage **API functional verification** and regression checks.
- Participated in **Agile/Scrum** ceremonies, sprint planning, daily standups, and peer code reviews.

EDUCATION & CREDENTIALS

Bachelor of Information Technology (Honours) May 2023 – June 2026
[City University Malaysia](#) Petaling Jaya, Selangor, Malaysia

Cumulative GPA: **3.47 / 4.00** (High Distinction / Second Class Upper) • Medium of Instruction: **English (Registrar Certified)**
Key Coursework: Software Engineering, Data Structures, Database Systems, Systems Analysis & Design, Computer Networks, Cyber Security, Cloud Architecture, DevOps, Python Programming, Object-Oriented Programming (Java), Web Development.

NVQ Level 4 in Web Development Certified
[Vocational Training Authority \(VTA\)](#) Kinniya, Sri Lanka

TECHNICAL SKILLSET

Testing & QA:	Manual Functional Testing, FAT, SAT, UAT, Regression Testing, Smoke Testing, OIL Triage, Defect Logging, Test Evidence Documentation
Tools & Platforms:	Redmine (PCS Vision), Jira (Concepts), VMware Console, Git, GitHub, Microsoft Excel / Sheets (OIL Management)
Programming & Web:	Python, Java (OOP Fundamentals), PHP, Laravel, MySQL, HTML5, CSS3, RESTful APIs, JSON
Networking & Systems:	TCP/IP, Managed PoE Switches, NTP Synchronization, Active-Standby Server Redundancy, Windows 10/11 Endpoint Config, RBAC

PROFESSIONAL PROFILE & AVAILABILITY

Current Location:	Trincomalee, Sri Lanka	Relocation Availability:	Open to Domestic & Global Relocation
Languages:	English (Fluent / Degree Instruction), Tamil (Native)	Employment Availability:	Immediate (Zero Notice Period)
