PROFESSIONAL SUMMARY

Information Technology Graduate (Bachelor of IT Honours, CGPA: 3.47/4.0) with hands-on enterprise internship experience in Software Quality Assurance (QA), Systems Integration, System Administration, and IT Technical Support. Proven track record executing Factory and Site Acceptance Testing (FAT/SAT), defect lifecycle management, and High-Availability (HA) redundancy testing across major transit infrastructure projects (RTS Link, LRT3) and smart parking management systems (CPMS). Demonstrated expertise in user provisioning, endpoint configuration, network switch troubleshooting, and REST API development. Highly adaptable and fast-learning professional seeking to deliver immediate technical value in IT Operations, QA/UAT Testing, System Administration, and Low-Code/Technical Support roles.

CORE COMPETENCIES & TECHNICAL SKILLS

Testing & QA:	Manual & Functional Testing, Factory Acceptance Testing (FAT), Site Acceptance Testing (SAT), UAT, OIL Verification, Defect Lifecycle Management, Regression Testing, Screenshot/Video Audit Evidence.
Systems & IT Operations:	User Provisioning (IAM), Role-Based Access Control (RBAC), Windows 10/11 Endpoint Setup, NTP Time Synchronization, System Diagnostics, Workstation Deployment.
Infrastructure & Networking:	High-Availability (HA) Failover Testing, Disaster Recovery Validation, ASL Vikipedia Broadcast Controllers, D-Link/TP-Link Managed PoE Switches, TCP/IP, Physical Layer Patching.
Low-Code, Web & Databases:	Python, Java (Core OOP/Logic), PHP (Laravel), MySQL, REST APIs, HTML5, CSS3, Blade Templating, Git/GitHub, Postman API Testing.
Professional Attributes:	Analytical Problem-Solving, Cross-Team Communication (Clients, Developers, Site Engineers), Technical Documentation, On-Site Safety Compliance (EHS/PPE).

PROFESSIONAL WORK EXPERIENCE

Project Engineer Intern	Jan 2026 - July 2026
Guildford Integrated Systems Sdn. Bhd. Subang Jaya, Selangor, Malaysia	
- Executed Factory Acceptance Testing (FAT) and Site Acceptance Testing (SAT) for rapid transit infrastructure projects (RTS Johor Bahru-Singapore and LRT3 Shah Alam Line), validating Passenger Information Display Systems (PIDS) and Public Address (PA) software against client Outstanding Issues Lists (OILs). - Managed end-to-end defect lifecycle: identified software bugs, logged technical issue reports with video/screenshot evidence on PCS Vision tracker, collaborated with software developers on fixes, and performed regression testing for client sign-off. - Conducted High-Availability (HA) and redundancy failover testing on industrial ASL Vikipedia broadcast server racks, verifying active-standby automatic switchover, alarm handling, and disaster recovery during simulated network outages. - Performed System Administration and user provisioning, configuring user accounts, role-based access control (RBAC), and operating system settings across distributed station workstations. - Assembled and maintained a Hardware-in-the-Loop (HIL) test bench for Car Park Management Systems (CPMS), integrating microcontrollers (Raspberry Pi), relay modules, RFID/card reader terminals, and managed PoE network switches for 4+ months of continuous stability testing. - Supported on-site field commissioning at live LRT3 station facilities adhering to strict safety standards (PPE: hard hat, vest), performing physical hardware troubleshooting, cabling, and display controller normalization.	

PROFESSIONAL WORK EXPERIENCE (CONTINUED)

Web Developer Intern

Sep 2022 - Dec 2022

Xgen Groups (Pvt) Ltd. | Colombo, Sri Lanka

- Developed web application features and relational database schemas using PHP Laravel framework and MySQL.
- Implemented and standardized RESTful API endpoints to ensure consistent data integration between front-end and back-end services.
- Created and maintained comprehensive REST API technical documentation for developer reference and cross-team collaboration.
- Participated in Agile/Scrum workflows, sprint planning sessions, and peer code reviews.

EDUCATION

Bachelor of Information Technology (Honours)

May 2023 - June 2026

City University Malaysia | Petaling Jaya, Selangor, Malaysia

- CGPA: 3.47 / 4.00 (High Distinction / Second Class Upper) | Medium of Instruction: English (Certified)
- Relevant Coursework: Systems Analysis & Design, Database Systems, Computer Networks & Communications, Software Engineering, DevOps, Cloud Architecture, Artificial Intelligence, Cyber Security, Data Structures.

Web Developer NVQ Level 4

Jan 2021 - May 2026

Vocational Training Authority (VTA) | Kinniya, Sri Lanka

ACADEMIC & TECHNICAL PROJECTS

Student Social Connect Web Application (Final Year Project) | Laravel, MySQL, REST APIs, HTML5, CSS3

- Engineered a peer-to-peer web application enabling student networking, authentication, and messaging using Laravel and MySQL.
- Built RESTful endpoints for user profile management, implemented responsive Blade templates, and performed cross-browser testing.

CERTIFICATIONS & TECHNICAL WORKSHOPS

- Top Coders Coding Challenge 2025 - University Level Python Competition (July 2025)
- Python Programming Fundamentals (Level 2) - Top Coders Malaysia (July 2025)
- Game Development Workshop (Unity 3D) - City University Malaysia (May 2024)
- MERN Stack Development Workshop - FOSS & Mozilla Community of IIT Sri Lanka (2022)

LANGUAGES

- English: Fluent (Full Professional Proficiency - University Medium of Instruction)
- Tamil: Native Proficiency
