Ref: Reference / Recommendation Letter for Mohammed Sarook Mohammed Safith

To Whom It May Concern,

I am pleased to provide this reference and recommendation for Mohammed Sarook Mohammed Safith, who worked with Guildford Integrated Systems Sdn Bhd as a Project Engineer Intern from 26 January 2026 - 31 July 2026.

During his time with us, Safith contributed primarily to the LRT3 Passenger Information System and Car Park entry systems. He was also involved in other railway-related projects in the Klang Valley and Johor Baru, supporting project delivery activities across system coordination, site works, documentation, and technical follow-up.

Safith demonstrated a positive attitude, willingness to learn, and reliability in carrying out assigned responsibilities. He worked well with our team and showed commitment to understanding project requirements, coordinating with colleagues, and supporting work at site when required.

Based on his performance and conduct during his internship, I am happy to recommend Safith for future employment or further professional development opportunities. I believe he will be a valuable addition to any organisation that provides him with the opportunity to continue developing his engineering and project experience.

Yours sincerely,

Jonathan Ross

Director
